

Introducing C/S On the Right Track

The quiet, hookless curtain/track system that allows you to remove curtains for cleaning in less than a minute.

C/S On the Right Track patented hookless rings are the key to the system.

On the Right Track's patented hookless curtain rings are key to the hookless curtain concept. There are no more hooks, chains, snags and noise, and they allow you to remove or install your curtain in seconds.

FEATURES:

- Curtain rings are integrated in the curtain fabric and are designed to mount directly on the track.
- A quiet track for new construction or adaptors to use with existing track systems.
- Durable curtain rings can withstand countless washings.
- Change curtains fast by manually placing them on track or with our special installation tool (see page 5).
- Hookless curtain rings can be used on any fabric.
- Track comes available for straight and radius applications.

C/S On the Right Track gives you two ways to change curtains—fast!

On the Right Track curtains can be installed manually in seconds by simply closing the curtains and placing the open end of the hook directly on the quiet glide track.

With our exclusive curtain wand, your staff can remove or install curtains in seconds without the use of ladders. Simply insert the wand in the hookless rings and push onto the quiet glide track.

Retrofit existing track systems.

With our special track adaptors we can adapt your existing track with On the Right Track's silent guide rails, saving you the cost of buying a new track system.
