## Barbican's Halo wins Platinum at ADEX Awards

FORT ERIE, ON, - **Barbican** Architectural Products Ltd. is one of North America's leading manufacturers of award-winning energy efficient commercial and industrial lighting solutions. Barbican's comprehensive range of products offers environmentally responsible solutions that are effective for all applications.

The Halo by Barbican was created to offer a contemporary and compact design that merges seamlessly with its environment. The Halo was recognized by the judges of the ADEX awards,

# Press Release

for its superior product design and quality. Winner of the Platinum 2017 ADEX Award for Design Excellence by Design Journal Magazine.

Design Journal magazine is the international trade resource for interior designers, architects and facility managers since 1988 and the proud sponsor of the ADEX Awards.

ADEX stands for Awards for Design Excellence and is the largest and most prestigious awards program for product & project design in the A&D industry.

Manufactured to Barbican's highest construction standards, our Halo light fixture is made from aluminum with a painted white interior to allow for optimal light radiance and glow. The Halo is not intended to emit intense light but rather to create a soft, ambient effect. Only 4" in height, it is available in a range of diameters to meet your design needs for every project.

Available in LED only, the Halo uses the most advanced Green Energy technology.
